

Manual motor starter

Single-phase
1 Hp maximum @ 115V or 230V
25-60 Hz

The manual motor starter provides dependable overload protection for single-phase motors up to one horsepower (115 or 230 volts), and are the most economical starter choices where undervoltage protection is not required.

Features

- Terminal design; box terminals provide easy access for wiring
- Molded plastic switch housing; protects starter mechanism
- NEMA 1 enclosure
- Small size; open starter fits GEM™ or handy box

Open starters include an unmounted nameplate and are single pole. Each starter includes a heater, sized to trip the switch on approximately 125% motor current.
