

0-25% motorized outside air damper Cabinet Unit Heater

Features

Models RFF and RFS only

- Operational at 0% or 25% outside air
- Furnished with a 120V/60/1 synchronous motor that is wired to the blower to automatically open the damper when the fan starts
- When the power is off or interrupted, the damper returns to the closed position
- Located in bottom of floor mounted units only
- Damper motor always on right side when viewing unit from front side
- All listed dimensions are approximate and are subject to change without notice
- Modifications to the product specifications must be accepted by Zehnder Rittling at its base office

Unit size	A	B	C
02	29	11-5/8	15
03	35	14-5/8	15
